

兔抗 RARG 多克隆抗体

中文名称：兔抗 RARG 多克隆抗体

英文名称：Anti-RARG rabbit polyclonal antibody

级 别：RARC; NR1B3

抗 原：RARG

储 存：冷冻（-20℃）

宿 主：Rabbit

反应种属：Human

标 记 物：Unconjugate

相关类别：一抗

克隆类型：rabbit polyclonal

技术规格

Background:

This gene encodes a retinoic acid receptor that belongs to the nuclear hormone receptor family. Retinoic acid receptors (RARs) act as ligand-dependent transcriptional regulators. When bound to ligands, RARs activate transcription by binding as heterodimers to the retinoic acid response elements (RARE) found in the promoter regions of the target genes. In their unbound form, RARs repress transcription of their target genes. RARs are involved in various biological processes, including limb bud development, skeletal growth, and matrix homeostasis. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.

Applications:	ELISA, IHC
Name of antibody:	RARG
Immunogen:	Synthetic peptide of human RARG
Full name:	retinoic acid receptor, gamma
Synonyms:	RARC; NR1B3
SwissProt:	P13631
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human esophagus cancer
IHC Recommend dilution:	35-200
