

兔抗 RBMS2 多克隆抗体

- 中文名称：兔抗 RBMS2 多克隆抗体
- 英文名称：Anti-RBMS2 rabbit polyclonal antibody
- 别名：RNA binding motif single stranded interacting protein 2 SCR3
- 抗原：RBMS2
- 储存：冷冻（-20℃）
- 宿主：Rabbit
- 相关类别：一抗
- 反应种属：Human
- 标记物：Unconjugate
- 克隆类型：rabbit polyclonal

技术规格

Background:

The protein encoded by this gene is a member of a small family of proteins which bind single stranded DNA/RNA. These proteins are characterized by the presence of two sets of ribonucleoprotein consensus sequence (RNP-CS) that contain conserved motifs, RNP1 and RNP2, originally described in RNA binding proteins, and required for DNA binding. The RBMS proteins have been implicated in such diverse functions as DNA replication, gene transcription, cell cycle progression and apoptosis. This protein was isolated by phenotypic complementation of *cdc2* and *cdc13* mutants of yeast and is thought to suppress *cdc2* and *cdc13* mutants through the induction of translation of *cdc2*.

Applications:	ELISA, IHC
Name of antibody:	RBMS2
Immunogen:	Fusion protein of human RBMS2
Full name:	RNA binding motif single stranded interacting protein 2
Synonyms:	SCR3
SwissProt:	Q15434
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human esophagus cancer;
