

兔抗 SERPINB11 多克隆抗体

中文名称：兔抗 SERPINB11 多克隆抗体

英文名称：Anti-SERPINB11 rabbit polyclonal antibody

别名：EPIPIN; SERPIN11

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：SERPINB11

反应种属：Human, Mouse

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

SerpinB11 (serpin peptidase inhibitor, clade B (ovalbumin), member 11), also known as EPIPIN or SERPIN11, is a 392 amino acid cytoplasmic protein that belongs to the Ov-serpin subfamily and serpin family. Like other members of the serpin family, SerpinB11 has been identified as a noninhibitory intracellular protein. The gene encoding SerpinB11 maps to human chromosome 18, which houses over 300 protein-coding genes and contains nearly 76 million bases. There are a variety of diseases associated with defects in chromosome 18-localized genes, some of which include Trisomy 18 (also known as Edwards syndrome), Niemann-Pick disease, hereditary hemorrhagic telangiectasia, erythropoietic protoporphyrinemia, and others.

	orphyria and follicular lymphomas.
Applications:	ELISA, WB, IHC
Name of antibody:	SERPINB11
Immunogen:	Fusion protein of human SERPINB11
Full name:	serpin peptidase inhibitor, clade B (ovalbumin), member 11 (gene/pseudogene)
Synonyms :	EPIPIN; SERPIN11
SwissProt:	Q96P15
ELISA Recommended dilution:	2000-5000
IHC positive control:	Human thyroid cancer
IHC Recommend dilution:	10-50
WB Predicted band size:	44 kDa
WB Positive control:	Mouse lung tissue
WB Recommended dilution:	500-2000
