### 技术规格

<b>Background:</b>	This gene encodes a member of the STAT-induced S TAT inhibitor (SSI), also known as suppressor of cyto kine signaling (SOCS), family. SSI family members are cytokine-inducible negative regulators of cytokine sig naling. The expression of this gene is induced by var ious cytokines, including IL6, IL10, and interferon (IFN )gamma. The protein encoded by this gene can bin d to JAK2 kinase, and inhibit the activity of JAK2 kin ase. Studies of the mouse counterpart of this gene s uggested the roles of this gene in the negative regul ation of fetal liver hematopoiesis, and placental devel opment.
