

兔抗 GZMM 多克隆抗体

中文名称：兔抗 GZMM 多克隆抗体

英文名称：Anti-GZMM rabbit polyclonal antibody

别名：MET1; LMET1

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：GZMM

反应种属：Human, Rat

标记物：Unconjugate

克隆类型：Unconjugate

技术规格

Background:

Human natural killer (NK) cells and activated lymphocytes express and store a distinct subset of neutral serine proteases together with proteoglycans and other immune effector molecules in large cytoplasmic granules. These serine proteases are collectively termed granzymes and include 4 distinct gene products: granzyme A, granzyme B, granzyme H, and the protein encoded by this gene, granzyme M. Two transcript variants encoding different isoforms have been found for this gene.

| | |
|------------------------------------|-----------------------------------|
| Applications: | ELISA, IHC |
| Name of antibody: | GZMM |
| Immunogen: | Synthetic peptide of human GZMM |
| Full name: | granzyme M (lymphocyte met-ase 1) |
| Synonyms : | MET1; LMET1 |
| SwissProt: | P51124 |
| ELISA Recommended dilution: | 5000-10000 |
| IHC positive control: | Human tonsil |
| IHC Recommend dilution: | 20-100 |
