

## 兔抗 TNIP1 多克隆抗体

中文名称：兔抗 TNIP1 多克隆抗体

英文名称：Anti-TNIP1 rabbit polyclonal antibody

别名：VAN; NAF1; ABIN-1; nip40-1

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：TNIP1

反应种属：Human, Mouse

标记物：Unconjugate

克隆类型：rabbit polyclonal

### 技术规格

|                                    |                                                                                                                                                                                                                                                                                                                                                                                       |
|------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Background:</b>                 | This gene encodes an A20-binding protein which plays a role in autoimmunity and tissue homeostasis through the regulation of nuclear factor kappa-B activation. Mutations in this gene have been associated with psoriatic arthritis, rheumatoid arthritis, and systemic lupus erythematosus. Multiple transcript variants encoding different isoforms have been found for this gene. |
| <b>Applications:</b>               | ELISA, WB, IHC                                                                                                                                                                                                                                                                                                                                                                        |
