技术规格

Background:	This gene encodes a multi-pass membrane protein that is localized to the endoplasmic reticulum. It belongs to the sulfatase family and hydrolyzes several 3-beta-hydroxysteroid sulfates, which serve as metabolic precursors for estrogens, androgens, and cholesterol. Mutations in this gene are associated with X-linked ichthyosis (XLI). Alternatively spliced transcript variants resulting from the use of different promoters have been described for this gene.
Applications:	ELISA, WB, IHC
Name of antibody:	STS
Immunogen:	Synthetic peptide of human STS
Full name:	steroid sulfatase (microsomal), isozyme S
Synonyms:	ES; ASC; XLI; ARSC; SSDD; ARSC1

SwissProt:	P08842
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human liver cancer
IHC Recommend dilution:	10-50
WB Predicted band size:	65 kDa
