技术规格

Background:	This enzyme functions in the methionine salvage pathway by catalyzing the interconversion of methylthioribose-1-phosphate and methylthioribulose-1-phosphate. Elevated expression of the encoded protein is associated with metastatic melanoma and this protein promotes melanoma cell invasion independent of its enzymatic activity. Mutations in this gene may be associated with vanishing white matter disease (VMWD).
Applications:	ELISA, WB, IHC
Name of antibody:	MRI1
Immunogen:	Synthetic peptide of human MRI1
Full name:	methylthioribose-1-phosphate isomerase 1
Synonyms:	M1Pi; MRDI; MTNA; Ypr118w
