

兔抗 NIBAN3 多克隆抗体

中文名称：兔抗 NIBAN3 多克隆抗体

英文名称：Anti-NIBAN3 rabbit polyclonal antibody

别名：niban apoptosis regulator 3; BCNP1; FAM129C

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：NIBAN3

反应种属：Human

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

FAM129C, also known as BCNP1, BCNP1 is a 697 amino acid protein that belongs to the Niban family. Specifically expressed in B-lymphocytes, BCNP1 exists as five alternatively spliced isoforms. BCNP1 is highly expressed in B-cell malignancies, lymph node and spleen, with little to no expression in other tissues, including other hemopoietic tissues. The gene encoding the BCNP1 protein maps to human chromosome 19p13.11. Consisting of around 63 million bases with over 1,400 genes, chromosome 19 makes up over 2% of human genomic DNA. Chromosome 19 includes a diversity of interesting genes and is recognized for having the greatest gene density of the human chromosomes. It is the genetic home for a number of immunoglobulin superfamily members including the killer cell and leukocyte Ig-like receptors, a number of ICAMs, the CEA

	CAM and PSG family, and Fc γ receptors. Key genes for eye color and hair color also map to chromosome 19.
Applications:	ELISA, IHC
Name of antibody:	NIBAN3
Immunogen:	Synthetic peptide of human NIBAN3
Full name:	niban apoptosis regulator 3
Synonyms:	BCNP1; FAM129C
SwissProt:	Q86XR2
IHC positive control:	Human liver cancer
IHC Recommend dilution:	20-100
