

## 兔抗 MOS 多克隆抗体

中文名称：兔抗 MOS 多克隆抗体

英文名称：Anti-MOS rabbit polyclonal antibody

别名：MSV

相关类别：一抗

储存：冷冻（-20℃）避光

抗原：MOS

宿主：Rabbit

反应种属：Human

标记物：Unconjugate

克隆类型：Unconjugate

### 技术规格

|                                |                                                                                                                                                                                                                                 |
|--------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Background:</b>             | MOS is a serine/threonine kinase that activates the MAP kinase cascade through direct phosphorylation of the MAP kinase activator MEK (MAP2K1; MIM 176872) (Prasad et al., 2008 [PubMed 18246541]).[supplied by OMIM, Jul 2009] |
| <b>Applications:</b>           | WB                                                                                                                                                                                                                              |
| <b>Name of antibody:</b>       | MOS                                                                                                                                                                                                                             |
| <b>Immunogen:</b>              | Synthesized peptide derived from internal of human MOS.                                                                                                                                                                         |
| <b>Full name:</b>              | v-mos Moloney murine sarcoma viral oncogene homolog                                                                                                                                                                             |
| <b>Synonyms :</b>              | MSV                                                                                                                                                                                                                             |
| <b>SwissProt:</b>              | P00540                                                                                                                                                                                                                          |
| <b>WB Predicted band size:</b> | 38 kDa                                                                                                                                                                                                                          |

|                          |                  |
|--------------------------|------------------|
| WB Positive control:     | 293 cells lysate |
| WB Recommended dilution: | 500-3000         |
