

## 兔抗 TAL1(Ab-122) 多克隆抗体

中文名称：兔抗 TAL1(Ab-122) 多克隆抗体

英文名称：Anti-TAL1(Ab-122) rabbit polyclonal antibody

别名：SCL; TCL5; tal-1; bHLHa17

相关类别：一抗

储存：冷冻（-20℃）避光

抗原：TAL1(Ab-122)

宿主：Rabbit

反应种属：Human Mouse

标记物：Unconjugate

克隆类型：Unconjugate

### 技术规格

|                                |                                                                                                                                                                                                 |
|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Background:</b>             | Implicated in the genesis of hemopoietic malignancies. It may play an important role in hemopoietic differentiation. Serves as a positive regulator of erythroid differentiation By similarity. |
| <b>Applications:</b>           | WB                                                                                                                                                                                              |
| <b>Name of antibody:</b>       | TAL1(Ab-122)                                                                                                                                                                                    |
| <b>Immunogen:</b>              | Synthesized non-phosphopeptide derived from human TAL-1 around the phosphorylation site of serine 122 (Q-L-S(p)-P-P).                                                                           |
| <b>Full name:</b>              | T-cell acute lymphocytic leukemia 1                                                                                                                                                             |
| <b>Synonyms :</b>              | SCL; TCL5; tal-1; bHLHa17                                                                                                                                                                       |
| <b>SwissProt:</b>              | P17542                                                                                                                                                                                          |
| <b>WB Predicted band size:</b> | 34 kDa                                                                                                                                                                                          |
| <b>WB Positive control:</b>    | Jurkat cells treated with PMA (125ng/ml, 30mins) ly                                                                                                                                             |

|                                 |          |
|---------------------------------|----------|
|                                 | sate     |
| <b>WB Recommended dilution:</b> | 500-3000 |
