

兔抗 GSKIP 多克隆抗体

中文名称: 兔抗 GSKIP 多克隆抗体

英文名称: Anti-GSKIP rabbit polyclonal antibody

别名: GSK3B interacting protein; HSPC210; C14orf129

抗原: GSKIP

储存: 冷冻 (-20℃)

宿主: Rabbit

反应种属: Human, Mouse, Rat

相关类别: 一抗

标记物: Unconjugate

克隆类型: rabbit polyclonal

技术规格

Background:	This gene encodes a protein that is involved as a negative regulator of GSK3-beta in the Wnt signaling pathway. The encoded protein may play a role in the retinoic acid signaling pathway by regulating the functional interactions between GSK3-beta, beta-catenin and cyclin D1, and it regulates the beta-catenin/N-cadherin pool. The encoded protein contains a GSK3-beta interacting domain (GID) in its C-terminus, which is similar to the GID of Axin. The protein also contains an evolutionarily conserved RII-binding domain, which facilitates binding with protein kinase-A and GSK3-beta, enabling its role as an A-kinase anchoring protein. Alternatively spliced transcript variants have been observed for this gene.
Applications:	ELISA, IHC
Name of antibody:	GSKIP

Immunogen:	Fusion protein of human GSKIP
Full name:	GSK3B interacting protein
Synonyms:	HSPC210; C14orf129
SwissProt:	Q9P0R6
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human cervical cancer
IHC Recommend dilution:	30-150
