技术规格

Background:	This gene encodes a protein which was initially identified as a sphingomyelinase based on sequence similarity between bacterial sphingomyelinases and a yeast protein. Subsequent studies showed that its biological function is less likely to be as a sphingomyelinase and instead as a lysophospholipase.
Applications:	ELISA, WB, IHC
Name of antibody:	SMPD2
Immunogen:	Fusion protein of human SMPD2
Full name:	sphingomyelin phosphodiesterase 2
Synonyms:	ISC1; NSMASE; NSMASE1
