

## 兔抗 PRKCG 多克隆抗体

- 中文名称: 兔抗 PRKCG 多克隆抗体
- 英文名称: Anti-PRKCG rabbit polyclonal antibody
- 别 名: PKCC; PKCG; SCA14; PKC-gamma
- 相关类别: 一抗
- 储 存: 冷冻 (-20℃)
- 宿 主: Rabbit
- 抗 原: PRKCG
- 反应种属: Human, Mouse, Rat
- 标记物: Unconjugate
- 克隆类型: rabbit polyclonal

## 技术规格

Background:	Protein kinase C (PKC) is a family of serine- and threonin e-specific protein kinases that can be activated by calciu m and second messenger diacylglycerol. PKC family mem bers phosphorylate a wide variety of protein targets and are known to be involved in diverse cellular signaling pat hways. PKC also serve as major receptors for phorbol est ers, a class of tumor promoters. Each member of the PKC family has a specific expression profile and is believed to
	play distinct roles in cells. The protein encoded by this g ene is one of the PKC family members. This protein kinas e is expressed solely in the brain and spinal cord and its localization is restricted to neurons. It has been demonstr ated that several neuronal functions, including long term potentiation (LTP) and long term depression (LTD), specifi

	cally require this kinase. Knockout studies in mice also su ggest that this kinase may be involved in neuropathic pai n development. Defects in this protein have been associat ed with neurodegenerative disorder spinocerebellar ataxia- 14 (SCA14)
Applications:	ELISA, WB
Name of antibody:	PRKCG
Immunogen:	Synthetic peptide of human PRKCG
Full name:	protein kinase C, gamma
Synonyms :	PKCC; PKCG; SCA14; PKC-gamma
SwissProt:	P05129
ELISA Recommended dilution:	2000-5000
WB Predicted band size:	78 kDa
WB Positive control:	Mouse brain tissue
WB Recommended dilution:	500-2000
