

兔抗 PRKCA(Phospho-Tyr657) 多克隆抗体

中文名称:	兔抗 PRKCA(Phospho-Tyr657) 多克隆抗体
英文名称:	Anti-PRKCA(Phospho-Tyr657) rabbit polyclonal antibody
别名:	AAG6; PKCA; PRKACA; PKC-alpha
抗原:	PRKCA(Phospho-Tyr657)
储存:	冷冻 (-20℃) 避光
宿主:	Rabbit
相关类别:	一抗
反应种属:	Human
标记物:	Unconjugate
克隆类型:	rabbit polyclonal

技术规格

Background:	Protein kinase C (PKC) is a family of serine- and threonine-specific protein kinases that can be activated by calcium and the second messenger diacylglycerol. PKC family members phosphorylate a wide variety of protein targets and are known to be involved in diverse cellular signaling pathways. PKC family members also serve as major receptors for phorbol esters, a class of tumor promoters. Each member of the PKC family has a specific expression profile and is believed to play a distinct role in cells. The protein encoded by this gene is one of the PKC family members.
Applications:	WB
Name of antibody:	PRKCA(Phospho-Tyr657)

Immunogen:	Peptide sequence around phosphorylation site of tyrosine 657(F-S-Y(p)-V-N) derived from Human PKC α .
Full name:	protein kinase C, alpha
Synonyms:	AAG6; PKCA; PRKACA; PKC-alpha
SwissProt:	P17252
WB Predicted band size:	77 kDa
WB Positive control:	COLO205 lysates
WB Recommended dilution:	500-1000
