<b>Immunogen:</b>	Synthetic peptide of human RPS6KA2
<b>Name of antibody:</b>	RPS6KA2
<b>Applications:</b>	ELISA, IHC
<b>Background:</b>	This gene encodes a member of the RSK (ribosomal S6 kinase) family of serine/threonine kinases. This ki

nase contains 2 non-identical kinase catalytic domains and phosphorylates various substrates, including members of the mitogen-activated kinase (MAPK) signalling pathway. The activity of this protein has been implicated in controlling cell growth and differentiation. Alternate transcriptional splice variants, encoding different isoforms, have been characterized.
