

兔抗 TCIM 多克隆抗体

中文名称：兔抗 TCIM 多克隆抗体

英文名称：Anti-TCIM rabbit polyclonal antibody

别名：transcriptional and immune response regulator; TC1

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：TCIM

反应种属：Human, Mouse

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:	This gene encodes a small, monomeric, predominantly unstructured protein that functions as a positive regulator of the Wnt/beta-catenin signaling pathway. This protein interacts with a repressor of beta-catenin mediated transcription at nuclear speckles. It is thought to competitively block interactions of the repressor with beta-catenin, resulting in up-regulation of beta-catenin target genes. The encoded protein may also play a role in the NF-kappaB and ERK1/2 signaling pathways. Expression of this gene may play a role in the proliferation of several types of cancer including thyroid cancer, breast cancer and hematological malignancies. [provided by RefSeq, Nov 2011]
Applications:	ELISA, IHC
Name of antibody:	TCIM

Immunogen:	Fusion protein of human TCIM
Full name:	transcriptional and immune response regulator
Synonyms:	TC1; TC-1; C8orf4
SwissProt:	Q9NR00
IHC positive control:	Human gastric cancer and Human thyroid cancer
IHC Recommend dilution:	40-200
