### 技术规格

<b>Background:</b>	This gene encodes a protein that is involved in the Ras signal transduction pathway, growth inhibition, and nerve-growth factor induced differentiation processes, as determined in mouse and human cell line studies. In mouse, the encoded protein was initially isolated based on its ability to inhibit v-Ras transformation. Multiple alternatively spliced transcript variants for this gene have been reported; one of these variants was found only in glioma tumors.
<b>Applications:</b>	ELISA, WB, IHC
<b>Name of antibody:</b>	RSU1
<b>Immunogen:</b>	Fusion protein of human RSU1
