

兔抗 PRKCB(Phospho-Ser661) 多克隆抗体

中文名称:	兔抗 PRKCB(Phospho-Ser661) 多克隆抗体
英文名称:	Anti-PRKCB(Phospho-Ser661) rabbit polyclonal antibody
别名:	PKCB; PRKCB1; PRKCB2; PKC-beta
相关类别:	一抗
储存:	冷冻 (-20℃) 避光
宿主:	Rabbit
抗原:	PRKCB(Phospho-Ser661)
反应种属:	Human Mouse Rat
标记物:	Unconjugate
克隆类型:	Unconjugate

技术规格

Background:	Protein kinase C (PKC) is a family of serine- and threonine-specific protein kinases that can be activated by calcium and second messenger diacylglycerol. PKC family members phosphorylate a wide variety of protein targets and are known to be involved in diverse cellular signaling pathways. PKC family members also serve as major receptors for phorbol esters, a class of tumor promoters. Each member of the PKC family has a specific expression profile and is believed to play a distinct role in cells.
Applications:	WB
Name of antibody:	PRKCB(Phospho-Ser661)
Immunogen:	Peptide sequence around phosphorylation site of serine 661 (G-F-S(p)-Y-T) derived from Human PKCB.

Full name:	protein kinase C, beta
Synonyms :	PKCB; PRKCB1; PRKCB2; PKC-beta
SwissProt:	P05771
WB Predicted band size:	77 kDa
WB Positive control:	Hela cells lysates treated with Heat shock
WB Recommended dilution:	500-1000
