技术规格

Background:	This gene encodes a protein that contains an N-terminal RING finger motif and a putative coiled-coil domain. A similar murine protein interacts with TNFR-associated factor 1 (TRAF1), TNFR-associated factor 2 (TRAF2), and cylindromatosis. The interaction with TRAF2 inhibits TRAF2-mediated nuclear factor kappa-B, subunit 1 activation that is required for cell activation and protection against apoptosis.
Applications:	ELISA, IHC
Name of antibody:	TRAIP
Immunogen:	Fusion protein of human TRAIP
Full name:	TRAF interacting protein
Synonyms :	TRIP; RNF206
SwissProt:	Q9BWF2
ELISA Recommended dilution:	2000-10000

IHC positive control:	Human liver cancer and Human breast cancer
IHC Recommend dilution:	30-150
