

兔抗 SH3BGRL 多克隆抗体

中文名称：兔抗 SH3BGRL 多克隆抗体

英文名称：Anti-SH3BGRL rabbit polyclonal antibody

别名：SH3 domain binding glutamate rich protein like; SH3BGR; HEL-S-115

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：SH3BGRL

反应种属：Human, Mouse

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

SH3BGRL (SH3 domain binding glutamic acid-rich protein like), also known as SH3BGR, is a 114 amino acid protein that is ubiquitously expressed and is encoded by a gene which maps to the X chromosome of both human and mouse. Chromosome X, one of the two human sex chromosomes, contains nearly 153 million base pairs and encodes over 1,000 genes. In conjunction with chromosome Y, chromosome X is responsible for sex determination, as an X and a Y chromosome lead to normal male development, while two copies of an X chromosome lead to normal female development. There are a number of conditions related to an abnormal number and combination of sex chromosomes, some of which include Turner's syndrome, color blindness, hemophilia and Duchenne muscular dystrophy.

Applications:	ELISA, IHC
Name of antibody:	SH3BGRL
Immunogen:	Fusion protein of human SH3BGRL
Full name:	SH3 domain binding glutamate rich protein like
Synonyms:	SH3BGR; HEL-S-115
SwissProt:	O75368
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human tonsil
IHC Recommend dilution:	50-200
