技术规格

Background:	This gene encodes a cytoskeletal protein involved in actin-membrane attachment at sites of cell adhesion to the extracellular matrix (focal adhesion). Alternatively spliced transcript variants encoding different isoforms have been described for this gene. These isoforms exhibit different expression pattern, and have different biochemical, as well as physiological properties (PMID:9054445).
Applications:	ELISA, WB, IHC
Name of antibody:	PXN
Immunogen:	Synthetic peptide of human PXN
Full name:	paxillin
SwissProt:	P49023
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human ovarian cancer and Human tonsil
IHC Recommend dilution:	30-150

WB Predicted band size:	65 kDa
WB Positive control:	HT-29 cell lysate
WB Recommended dilution:	200-1000
