

## 兔抗 PLGLB2 多克隆抗体

- 中文名称：兔抗 PLGLB2 多克隆抗体
- 英文名称：Anti-PLGLB2 rabbit polyclonal antibody
- 别名：plasminogen-like B2; PLGP1
- 相关类别：一抗
- 储存：冷冻（-20℃）
- 宿主：Rabbit
- 抗原：PLGLB2
- 反应种属：Human
- 标记物：Unconjugate
- 克隆类型：rabbit polyclonal

### 技术规格

**Background:**

Cleavage of the serine proteinase plasminogen to form plasmin is the central event in the dissolution of blood clots by the fibrinolytic system. Within the fibrinolytic cascade, the serine proteinases urokinase-type plasminogen activator (uPA) and tissue-type plasminogen activator (tPA) activate the proenzyme plasminogen by cleaving plasminogen to form the fibrinolytically active enzyme plasmin. PLGLB2 (plasminogen-like B2), also known as PLGP1, is a 96 amino acid protein that resembles the N-terminal plasminogen activation peptide, which is released from plasminogen during conversion to plasmin. PLGLB2 may bind to lysine binding sites present in the kringle structures of plasminogen, an event that interferes with the binding of fibrin or  $\alpha$ -2

	lasmin to plasminogen and may result in the localization of activity at sites necessary for extracellular matrix destruction.
<b>Applications:</b>	ELISA, IHC
<b>Name of antibody:</b>	PLGLB2
<b>Immunogen:</b>	Fusion protein of human PLGLB2
<b>Full name:</b>	plasminogen-like B2
<b>Synonyms:</b>	PLGP1
<b>SwissProt:</b>	Q02325
<b>ELISA Recommended dilution:</b>	5000-10000
<b>IHC positive control:</b>	Human thyroid cancer
<b>IHC Recommend dilution:</b>	30-150
