

兔抗 MAGEB18 多克隆抗体

中文名称：兔抗 MAGEB18 多克隆抗体

英文名称：Anti-MAGEB18 rabbit polyclonal antibody

相关类别：一抗

储 存：冷冻（-20℃）

宿 主：Rabbit

抗 原：MAGEB18

反应种属：Human

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:	The melanoma-associated antigen (MAGE) family consists of a number of antigens recognized by cytotoxic T lymphocytes. The MAGE genes were initially isolated from different kinds of tumors and, based on their virtually exclusive tumor-specific expression in adult tissues, they have been used as targets for cancer immunotherapy. MAGE genes encode for tumor-rejection antigens that are expressed in tumors of different histologic types and in normal testis and placenta. MAGE-B18 (melanoma-associated antigen B18) is a 343 amino acid protein that contains one MAGE domain and may be involved in tumorigenesis. The gene encoding MAGE-B18 maps to human chromosome X, which contains nearly 153 million base pairs and houses over 1,000 genes.
Applications:	ELISA, WB

Name of antibody:	MAGEB18
Immunogen:	Synthetic peptide of human MAGEB18
Full name:	melanoma antigen family B18
SwissProt:	Q96M61
ELISA Recommended dilution:	5000-10000
WB Predicted band size:	39 kDa
WB Positive control:	Human testis tissue lysate
WB Recommended dilution:	200-1000
