

兔抗 MKL1 多克隆抗体

- 中文名称：兔抗 MKL1 多克隆抗体
- 英文名称：Anti-MKL1 rabbit polyclonal antibody
- 别名：MAL; BSAC; MRTF-A
- 相关类别：一抗
- 抗原：MKL1
- 储存：冷冻（-20℃）避光
- 宿主：Rabbit
- 反应种属：Human
- 标记物：Unconjugate
- 克隆类型：rabbit polyclonal

技术规格

Background:	The protein encoded by this gene interacts with the transcription factor myocardin, a key regulator of smooth muscle cell differentiation. The encoded protein is predominantly nuclear and may help transduce signals from the cytoskeleton to the nucleus. This gene is involved in a specific translocation event that creates a fusion of this gene and the RNA-binding motif protein-15 gene. This translocation has been associated with acute megakaryocytic leukemia. Alternative splicing results in multiple transcript variants.
Applications:	WB
Name of antibody:	MKL1
Immunogen:	Synthesized peptide derived from N-terminal of human MK

	L1.
Full name:	megakaryoblastic leukemia (translocation) 1
Synonyms :	MAL; BSAC; MRTF-A
SwissProt:	Q969V6
WB Predicted band size:	99 kDa
WB Positive control:	Hela cells and Huvec cells lysates
WB Recommended dilution:	500-3000
