技术规格

Background:	The protein encoded by this gene is a proton-linked monocarboxylate transporter that catalyzes the movement of many monocarboxylates, such as lactate and pyruvate, across the plasma membrane. Mutations in this gene are associated with erythrocyte lactate transporter defect. Alternatively spliced transcript variants have been found for this gene.
Applications:	ELISA, IHC
Name of antibody:	SLC16A1
Immunogen:	Synthetic peptide of human SLC16A1
Full name:	Solute carrier family 16, member 1 (monocarboxylic acid transporter 1)

Synonyms :	MCT, HHF7, MCT1
SwissProt:	P53985
ELISA Recommended dilution:	2000-10000
IHC positive control:	Human liver cancer and Human ovarian cancer
IHC Recommend dilution:	50-200
