

兔抗 TADA3 多克隆抗体

中文名称：兔抗 TADA3 多克隆抗体

英文名称： Anti-TADA3 rabbit polyclonal antibody

别名： transcriptional adaptor 3; ADA3; NGG1; hADA3; STAF54; TADA3L

相关类别： 一抗

储存： 冷冻（-20℃）

宿主： Rabbit

抗原： TADA3

反应种属： Human, Mouse, Rat

标记物： Unconjugate

克隆类型： rabbit polyclonal

技术规格

Background:

DNA-binding transcriptional activator proteins increase the rate of transcription by interacting with the transcriptional machinery bound to the basal promoter in conjunction with adaptor proteins, possibly by acetylation and destabilization of nucleosomes. The protein encoded by this gene is a transcriptional activator adaptor and a component of the histone acetyl transferase (HAT) coactivator complex which plays a crucial role in chromatin modulation and cell cycle progression. Along with the other components of the complex, this protein links transcriptional activators bound to specific promoters, to histone acetylation and the transcriptional machinery. The protein is also involved in the stabilization and activation of the p53 tumor suppressor protein that plays a role in the cellular response to DNA damage. Alterna

	te splicing results in multiple transcript variants of this gene.
Applications:	ELISA, IHC
Name of antibody:	TADA3
Immunogen:	Fusion protein of human TADA3
Full name:	transcriptional adaptor 3
Synonyms:	ADA3; NGG1; hADA3; STAF54; TADA3L
SwissProt:	O75528
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human thyroid cancer
IHC Recommend dilution:	25-100
