技术规格

Background:	The uptake of nucleosides by transporters, such as SLC29A2, is essential for nucleotide synthesis by salvage pathways in cells that lack de novo biosynthetic pathways. Nucleoside transport also plays a key role in the regulation of many physiologic processes through its effect on a denosine concentration at the cell surface.
Applications:	ELISA, WB, IHC
Name of antibody:	SLC29A2
Immunogen:	Synthetic peptide of human SLC29A2
Full name:	solute carrier family 29 member 2
Synonyms:	ENT2; DER12; HNP36
SwissProt:	Q14542

ELISA Recommended dilution:	5000-10000
IHC positive control:	Human gastric cancer and Human cervical cancer
IHC Recommend dilution:	25-50
WB Predicted band size:	50 kDa
WB Positive control:	MCF-7 cell lysate
WB Recommended dilution:	500-2000
