

Cy3 标记的小鼠抗山羊 IgG

中文名称: Cy3 标记的小鼠抗山羊 IgG

英文名称: Cy3-conjugated Mouse anti-goat IgG

相关类别: 荧光标记二抗

储 存: 冷冻(-20℃)

标 记 物: Cy3

技术规格

	Immunoglobulin G (IgG) is one of the most abundant proteins in ser
	um with normal levels between 8-17 mg/ml in adult blood. IgG is im
	portant for our defense against microorganisms and the molecules ar
	e produced by B lymphocytes as a part of our adaptive immune resp
Background	onse. The IgG molecule has two separate functions; to bind to the p
	athogen that elicited the response and to recruit other cells and mol
	ecules to destroy the antigen. The variability of the IgG pool is gener
	ated by somatic recombination and the number of specificities in an
	individual at a given time point is estimated to be 1011 variants.
Applications	1/20-100 for FCM 1/20-200 for Immunohistochemistry/cytochemistry
