

CCND1 抗原(重组蛋白)

- 中文名称: CCND1 抗原(重组蛋白)
- 英文名称: CCND1 Antigen (Recombinant Protein)
- 储存: 冷冻(-20℃)
- 相关类别: 抗原

概述

Full length fusion protein

技术规格

| Full name: | cyclin D1 |
|--------------------|---|
| Synonyms: | BCL1, PRAD1, U21B31, D11S287E |
| Swissprot: | P24385 |
| Gene Accession: | BC000076 |
| Purity: | >85%, as determined by Coomassie blue stained SDS-PAGE |
| Expression system: | Escherichia coli |
| Tags: | His tag C-Terminus, GST tag N-Terminus |
| Background: | The protein encoded by this gene belongs to the highly conser ved cyclin family, whose members are characterized by a dram atic periodicity in protein abundance throughout the cell cycle. Cyclins function as regulators of CDK kinases. Different cyclins exhibit distinct expression and degradation patterns which cont ribute to the temporal coordination of each mitotic event. This cyclin forms a complex with and functions as a regulatory sub unit of CDK4 or CDK6, whose activity is required for cell cycle G1/S transition. This protein has been shown to interact with t umor suppressor protein Rb and the expression of this gene is regulated positively by Rb. Mutations, amplification and overex pression of this gene, which alters cell cycle progression, are o |
