

兔抗 GHSR 多克隆抗体

中文名称：兔抗 GHSR 多克隆抗体

英文名称： Anti-GHSR rabbit polyclonal antibody

相关类别： 一抗

储 存： 冷冻（-20℃）

宿 主： Rabbit

抗 原： GHSR

反应种属： Human, Mouse, Rat

标记物： Unconjugate

克隆类型： rabbit polyclonal

技术规格

Background:	This gene encodes a member of the G-protein coupled receptor family. The encoded protein may play a role in energy homeostasis and regulation of body weight. Two identified transcript variants are expressed in several tissues and are evolutionary conserved in fish and swine. One transcript, 1a, excises an intron and encodes the functional protein; this protein is the receptor for the Ghrelin ligand and defines a neuroendocrine pathway for growth hormone release. The second transcript (1b) retains the intron and does not function as a receptor for Ghrelin; however, it may function to attenuate activity of isoform 1a. Mutations in this gene are associated with autosomal idiopathic short stature.
Applications:	ELISA, WB
Name of antibody:	GHSR
Immunogen:	Synthetic peptide of human GHSR

Full name:	growth hormone secretagogue receptor
SwissProt:	Q92847
ELISA Recommended dilution:	1000-5000
WB Predicted band size:	41 kDa
WB Positive control:	A549 cells
WB Recommended dilution:	1000-3000
