### 技术规格

<b>Background:</b>	Transient receptor potential ion channels (TRPC) are a superfamily of six transmembrane segment-spanning gated cation channels. TRP subtypes mediate store-operated Ca <sup>2+</sup> entry, a process involving Ca <sup>2+</sup> influx and replenishment of Ca <sup>2+</sup> stores formerly emptied through the action of inositol 1,4,5-trisphosphate production and other Ca <sup>2+</sup> mobilizing agents.
<b>Applications:</b>	ELISA, IHC
<b>Name of antibody:</b>	TRPM8
<b>Immunogen:</b>	Fusion protein of human TRPM8
<b>Full name:</b>	transient receptor potential cation channel, subfamily M, member 8
<b>Synonyms :</b>	TRPP8; LTRPC6
<b>SwissProt:</b>	Q7Z2W7

ELISA Recommended dilution:	1000-2000
IHC positive control:	Human esophagus cancer
IHC Recommend dilution:	25-100
