

MRPS18C 抗原(重组蛋白)

中文名称: MRPS18C 抗原(重组蛋白)

英文名称: MRPS18C Antigen (Recombinant Protein)

别 名: CGI-134; S18mt-c; MRPS18-1; mrps18-c; MRP-S18-1; MRP-S18-c

储 存: 冷冻(-20℃)

相关类别: 抗原

概述

Full length fusion protein

技术规格

Full name:	mitochondrial ribosomal protein S18C
Synonyms:	CGI-134; S18mt-c; MRPS18-1; mrps18-c; MRP-S18-1; MRP-S18-c
Swissprot:	Q9Y3D5
Gene Accession:	BC005186
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	Mammalian mitochondrial ribosomal proteins are encoded by nuclear genes and help in protein synthesis within the mitochondrion. Mitoch ondrial ribosomes (mitoribosomes) consist of a small 28S subunit and a large 39S subunit. They have an estimated 75% protein to rRNA co mposition compared to prokaryotic ribosomes, where this ratio is reve rsed. Another difference between mammalian mitoribosomes and prok aryotic ribosomes is that the latter contain a 5S rRNA. Among differe nt species, the proteins comprising the mitoribosome differ greatly in sequence, and sometimes in biochemical properties, which prevents ea sy recognition by sequence homology.
