

PSMB4 抗原(重组蛋白)

- 中文名称: PSMB4 抗原(重组蛋白)
- 英文名称: PSMB4 Antigen (Recombinant Protein)

别 名: proteasome subunit beta 4; HN3; HsN3; PROS26; PROS-26

储存: 冷冻 (-20℃)

相关类别: 抗原

概述

Fusion protein corresponding to a region derived from 46-264AA amino acids of human PSMB4

技术规格

Full name:	proteasome subunit beta 4
Synonyms:	HN3; HsN3; PROS26; PROS-26
Swissprot:	P28070
Gene Accession:	BC017307
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	The proteasome is a multicatalytic proteinase complex with a highly o rdered ring-shaped 20S core structure. The core structure is composed of 4 rings of 28 non-identical subunits; 2 rings are composed of 7 alp ha subunits and 2 rings are composed of 7 beta subunits. Proteasome s are distributed throughout eukaryotic cells at a high concentration a nd cleave peptides in an ATP/ubiquitin-dependent process in a non-ly sosomal pathway. An essential function of a modified proteasome, the immunoproteasome, is the processing of class I MHC peptides. This g ene encodes a member of the proteasome B-type family, also known as the T1B family, that is a 20S core beta subunit.
