技术规格

Background:	This gene encodes one of two family members belongi ng to the T-cell ubiquitin ligand (TULA) family. Both fa mily members can negatively regulate T-cell signaling. T his family member can facilitate growth factor withdraw al-induced apoptosis in T cells, which may occur via its interaction with AIF, an apoptosis-inducing factor. Altern ative splicing of this gene results in multiple transcript variants.
Applications:	ELISA, IHC
Name of antibody:	UBASH3A
Immunogen:	Fusion protein of human UBASH3A
Full name:	ubiquitin associated and SH3 domain containing A
Synonyms:	TULA; CLIP4; STS-2; TULA-1
SwissProt:	P57075

ELISA Recommended dilution:	5000-10000
IHC positive control:	Human tonsil and human esophagus cancer
