

## SSBP4 抗原(重组蛋白)

- 中文名称: SSBP4 抗原(重组蛋白)
- 英文名称: SSBP4 Antigen (Recombinant Protein)
- 储存: 冷冻(-20℃)
- 相关类别: 抗原

概述

Full length fusion protein

技术规格

Full name:	single stranded DNA binding protein 4
Swissprot:	Q9BWG4
Gene Accession:	BC000274
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	SSBP4 (single stranded DNA binding protein 4) is a 385 amino acid n uclear protein that contains one LisH domain and multiple phosphoryl ated amino acid residues. The gene encoding SSBP4 maps to human chromosome 19, which consists of over 63 million bases, houses appr oximately 1,400 genes and is recognized for having the greatest gene density of the human chromosomes. It is the genetic home for a nu mber of immunoglobulin (Ig) superfamily members, including the kille r cell and leukocyte Ig-like receptors, a number of ICAMs, the CEACA M and PSG family and Fc receptors (FcRs).
