

VAMP5 抗原(重组蛋白)

- 中文名称: VAMP5 抗原(重组蛋白)
- 英文名称: VAMP5 Antigen (Recombinant Protein)
- 储存: 冷冻(-20℃)
- 相关类别: 抗原

概述

Full length fusion protein

技术规格

Full name:	vesicle-associated membrane protein 5
Swissprot:	O95183
Gene Accession:	BC017891
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	Synaptobrevins/VAMPs, syntaxins, and the 25-kD synaptosomal-associ ated protein are the main components of a protein complex involved in the docking and/or fusion of vesicles and cell membranes. The VA MP5 gene is a member of the vesicle-associated membrane protein (VAMP)/synaptobrevin family and the SNARE superfamily. This VAMP f amily member may participate in vesicle trafficking events that are as sociated with myogenesis.
