### 概述

Synthetic peptide: HHHHHH

### 技术规格

<b>Full name</b>	HHHHHH Tag
<b>Synonyms</b>	6 His epitope tag
<b>Background</b>	The 6 X histidine motif is used as a tag on many recombinant proteins to facilitate purification. It can then be purified using immobilized metal ions, traditionally nickel, in a procedure termed immobilized-metal affinity chromatography. Further analysis of the protein can be achieved using an antibody specific to the 6 X histidine in techniques such as western blotting. The antibody recognizes the His-tag fused to targeted proteins in transfected or transformed cells.
