Background:	This gene encodes a member of the MAPEG (Membrane Associated Proteins in Eicosanoid and Glutathione metabolism) protein family. M embers of this family are involved in the production of leukotrienes and prostaglandin E, important mediators of inflammation. This gene encodes an enzyme which catalyzes the conjugation of leukotriene A 4 and reduced glutathione to produce leukotriene C4. This enzyme a Iso demonstrates glutathione-dependent peroxidase activity towards I ipid hydroperoxides.
