

C4BPB 抗原（重组蛋白）

中文名称：C4BPB 抗原（重组蛋白）

英文名称：C4BPB Antigen (Recombinant Protein)

别 名： complement component 4 binding protein beta; C4BP

储 存： 冷冻（-20℃）

相关类别：抗原

概述

Fusion protein corresponding to a region derived from 21-251 amino acids of human C4BPB

技术规格

Full name:	complement component 4 binding protein beta
Synonyms:	C4BP
Swissprot:	P20851
Gene Accession:	BC005378
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	This gene encodes a member of a superfamily of proteins composed predominantly of tandemly arrayed short consensus repeats of approximately 60 amino acids. A single, unique beta-chain encoded by this gene assembles with seven identical alpha-chains into the predominant isoform of C4b-binding protein, a multimeric protein that controls activation of the complement cascade through the classical pathway. C4b-binding protein has a regulatory role in the coagulation system also, mediated through the beta-chain binding of protein S, a vitamin K-dependent protein that serves as a cofactor of activated protein C. The genes encoding both alpha and beta chains are located adjacent to each other on chromosome 9.

	ent to each other on human chromosome 1 in the regulator of complement activation gene cluster. Alternative splicing gives rise to multiple transcript variants.
