

REG4 抗原(重组蛋白)

REG4 抗原(重组蛋白) 中文名称:

英文名称: **REG4 Antigen (Recombinant Protein)**

别 名: regenerating islet-derived family, member 4; GISP; RELP; REG-IV

储 存: 冷冻(-20℃)

相关类别: 抗原

概述

Fusion protein corresponding to C terminal 102 amino acids of human REG4

技术规格

Full name:	regenerating islet-derived family, member 4
Synonyms:	GISP; RELP; REG-IV
Swissprot:	Q9BYZ8
Gene Accession:	BC017089
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	Calcium-independent lectin displaying mannose-binding specificity a nd able to maintain carbohydrate recognition activity in an acidic e nvironment. May be involved in inflammatory and metaplastic responses of the gastrointestinal epithelium.
