

TNFAIP2 抗原（重组蛋白）

中文名称： TNFAIP2 抗原（重组蛋白）

英文名称： TNFAIP2 Antigen (Recombinant Protein)

别名： tumor necrosis factor, alpha-induced protein 2; B94; EXOC3L3

储存： 冷冻（-20℃）

相关类别： 抗原

概述

Fusion protein corresponding to C terminal 231 amino acids of human TNFAIP2

技术规格

Full name:	tumor necrosis factor, alpha-induced protein 2
Synonyms:	B94; EXOC3L3
Swissprot:	Q03169
Gene Accession:	BC128449
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	This gene was identified as a gene whose expression can be induced by the tumor necrosis factor alpha (TNF) in umbilical vein endothelial cells. The expression of this gene was shown to be induced by retinoic acid in a cell line expressing an oncogenic version of the retinoic acid receptor alpha fusion protein, which suggested that this gene may be a retinoic acid target gene in acute promyelocytic leukemia.
